Optimize security, productivity, and device management for your wearable devices.

BlueFletch Enterprise is now fully compatible with Zebra Technologies' WS50 Wearable Computer, bringing a powerful suite of tools to enhance security, streamline workflows, and improve device management. The integration of BlueFletch Enterprise with Zebra's smallest and most flexible Android wearable device delivers comprehensive management and security solutions designed for frontline workers across industries like retail, warehousing, logistics, and healthcare.

Key Features and Benefits

Single Sign-On (SSO) and Authentication

Seamless SSO Experience: Employees can securely log into multiple applications using a single set of credentials, reducing login fatigue and improving productivity.

Accelerated Login Process: The new Wearable Login Host feature shortens login time, enhancing user convenience by speeding up access to critical apps.

Enhanced Security Standards: Devices require Android 7.0 (SDK 24) or higher, ensuring your enterprise maintains robust data protection standards.

Efficient Reauthentication: Users can securely check in and out of devices, reducing downtime and maintaining accountability for device usage.

Customizable Launcher Experience

Tailored Workflows: Custom Launchers designed to fit specific user roles or job functions, providing workers with only the tools and applications they need, minimizing distractions and boosting efficiency.

User-Friendly Interface: The WS50 interface is optimized to offer a refined user experience with smoother data flow and quicker access to relevant information.

Optimized Performance: Enhanced data transfer speeds for faster, more responsive operations across Zebra wearable devices.

Comprehensive Device Accountability

Check-In/Check-Out Functionality: Enables efficient management of shared devices, reducing the risk of device loss and ensuring each device is accounted for after every shift.

Device Usage Monitoring: Monitor device health, location, and user behavior in real-time to ensure the WS50 is operating at peak efficiency.

Multi-Device Support: In addition to the WS50, BlueFletch Enterprise extends support to other Zebra Android devices, including TC, MC, ET tablets, and CC kiosks.

Why choose BlueFletch Enterprise for Zebra WS50?

Enhanced Operational Efficiency

By streamlining the login and authentication processes, BlueFletch Enterprise minimizes downtime, helping organizations get more out of their WS50 wearable devices. Frontline workers can quickly access the tools they need, ensuring a more productive and secure work environment.

Unparalleled Security

BlueFletch ensures that Zebra WS50 devices are protected by advanced security protocols, including minimum Android version requirements and efficient reauthentication methods. This mitigates risks while maintaining ease of use for employees handling sensitive information.

Versatile Integration Capabilities

Our solution seamlessly integrates with existing Zebra software, including PTT Pro and Zebra AI Assist, providing businesses with a unified platform for enhanced communication and decision-making on the go.

Key Industries and Use Cases

Retail

Easily manage shift-based device checkouts, ensuring that workers have secure and fast access to inventory systems, payment terminals, and task management apps.

Warehousing

Enable seamless hands-free workflows for picking, packing, and shipping processes, while maintaining device accountability across large teams.

Healthcare

Streamline access to patient information and task tracking while maintaining strict security protocols with SSO integration for healthcare-specific applications.

Support and Deployment

BlueFletch Enterprise is ready to optimize your wearable device management:

- Immediate availability for existing and new BlueFletch customers.
- Full support for Zebra WS50 and other key Zebra Android devices.
- Deployment assistance and ongoing support from BlueFletch's dedicated team to ensure smooth integration and long-term success.
